[Despatch Abstract.]

VETERINARY Purvadio Pasuviadvan - Development.

To

The Hon'ble the Minister for Local Administration

Department, Fort St. George, M A D R A S.

- - -

MEMORANDUM SUBMITTED BY THE PRESIDENT, ANDHRA JATHEEYA PASUVAIDYA PEETH, T E N A L I.

Sub: Ayurveda Pasuvaidyam - Development and Patronisation - requested.

*****

S I R,

We wish to convey our hearty congratulations to the congress Government of Madras upon their Revolutionary and self-sufficient schemme published recently to achieve further development of our Ancient Revered Science, Aurveds, which was suppressed since several years on account of the step-motherly affection shown by the Foreign Government.

We wish to thank the Hon'ble Minister for Public Health for her great work during so short a period of time in producing such a valuable scheme which is calculated to make the fullest use of the 40 thousand Vaidyas and Hakims.

We wish to bring to your Notice that Ayurveda Pasu Vaidyam is one of the several Oriental Sciences which rendered valuable services to the mother country. But owing to the special patronage given to Western Veterinary Science and its practice, Ayurvedic Veterinary Science has been discoura and its practice been relegated to our rural folk, who had continued their loyalty to this cheap and serviceable science. It is, as you all know, an universally acknowledged and simple truth and has been often repeated on many an occasion by our Revered Leader Mahatmaji, that the real welfare of a country lies in the proper growth of the village, and the growth of village, lies, you also know, with the Ryot population and the very economic existence of our Ryots depends so long only upon the proper breeding and maintenance of their dumb millions of cattle.

But on account of lack of proper treatment to the animals, they are also decaying, just as our Human beings are suffering on account of inadequate distribution of medical aid. Thus the financial position of the Ryot has been greatly weakened. Except in a few places, there are at present no Veterinary Hospitals in our Presidency. Even the Existing Hospitals are far way from our villages.

There are several Veterinary dispensaries run by poor unpatronised Heridatory vaidyas in this Presidency. This work has been going on since generations, though Government did not encourage it. There isa great need to train these Vaidyas in the same way as the Ayurvedic Vaidyas are being trained in the Indian School of Medicine and the various private Ayurvedic Colleges. The practice of Ayurvedic Veterinar Medicine has to be systematised and scientifically developed, so that our dependence upon mere quack practice can be eliminate The pineers of Ayurveda Pasu Vaidyam has recorded their experiences and experiments through several books written by them (i.e.) Nakula and Sahadeva. In the time of the Great Ashoka, much spade work was done for the promotion of

the Pasuvaidyam and he established one Hospital for each village for the proper treatment of the cattle.

Now several of our Ryots are obliged to allow the animals to die a slow death because of their ignorance, unavailability of Veterinary aid and the costliness of the Western Medical Services.

In order to render the minimum necessary services in this respect, our Andhra Jatheeya Pasu Vaidya Vidya Pith was organised and started under the patronisation of our revered leader "RYOTU RANGA" in the year 1928 in Andhra Desha. Since then several students were coached up and sent to many a village for proper rendering of service to the needy cattle. This Peetham was organised by Yejella Sree Ramulu Chowdary with the following objects:-

(1) To train students in the Ayurve__ .asu Vaidyam and send them to Villages for opending Hospitals.

(2) To establish Veterinary Hospitals and colleges in various centres in the country.

(3) To Publish books on Veterinayy Science in local languages.

(4) To arrange lectures on the Science for th propogation of the same.

(5) To offer medical advice to the needy Ryots.

(6) To advise Ryots for checking the prevalence of of the several diseases to the cattle.

(7) To conduct examinations;

(8) To arrange Ryot cattle exhibitions; to hold conferences and to encourage the ryots to breed pedigree cattle by offering prize prizes etc.

With the objects noted above, we have started one Aynrvedic Veterinary College and Trained nearly 100 Ryots students upto 1938. This college was first opened at Angaluru Kistna District, and the same is now being run at Tenali which was opened by Bhishagwara Dr. A. Lakshmipathy, B.A., N.B. & C.M, in the year 1943. We have since imparted instruction to 150 pupils with the degree of pasu vaidya Acharya. Ten Convocations have taken place. The convocation addresses were given by Professor N.G. Ranga, Gollapudi Seetharama Sastry, Rajah Saheb of Challppalli, Kalluri Chandra Mouli, M.L.A., Gadde Rangaiah Naidu, M.L.A., Professor D. Rangacharyulu and others blessed the ~~Inatition~~ on those occasions. Several of the Students got grants through the local bodies. Instead of encouraging and developing this essential poor-man's venture, the then Government issued the G.O.No. 342, Local Administration Departmen dated 27th January, 1939,. That G.O. ordered the Local Boards not to recommend grants etc., to the Veterinary Hospitals run by private practitioners. The present Government will naturally understand the serious implications involved in that G.O. The result was that the District Boards of Guntur Kistna, West and East Godavari, which understood the value of Aynrvedic Treatment for cattle and the efficiency of our diploma-holders and practitioners and had therefore been offering financial encouragement were thus forced to stop their grants to our dispensaries and practitioners.

Twenty six text books were published on behalf of the Peetham. They include Anubhava Pasu Vaidya Chintamani which was approved by the Text Book Committee. It is on account of the said valuable and standard book, the Ayurvedic treatment of cattle has become popular in all villages particularly in Andhra Desha. A monthly Journal was run for four years by name "Pasu Samrakshna." Propoganda work was done through several pamphlets etc. and through their distribution in all the villages. Under auspices of our Pitham, we are running a Model Pharmacy for sale of several Sastric Medicines useful for the Ryots. These medicines, as reported the Ryot population itself, have proved useful. Both through our literature and our trained practitioners, a large number of peasants have become proficient in the administration of most of our and other specificies. In view of the services rendered by the President of Vaidya Pettham, Dr. Yejella Sreeramulu, the Government of India have selected him as an Honorary member of the Live Stock Committee, Delhi. Under the auspices of village Industries at Jogannapalem patronised by the Hon'ble Sri T. Prakasam panthulu, the Premier of the Government of Madras, one veterinary Hospital is being run by one of our diploma holders came out successful in our college. Another Graduate of our college is funning one Hospital at Kalyana Kavur under the AUSPICES OF THE VINAYASTRAMAM run by Sardar Gollapudi Seetharama Sastry. But unless and until the present Congress Government decides to champion this cause as they have done in the case of Ayurveda, and developes the research, development and use of our Ancient Pasuvaidya Science there cannot be any speedy or effective salvation for the poor ryots, who are really suffering on account of the inadequacy of proper and cheap treatment to the dumb millions of their cattle.

We, therefore, pray that the Government be pleased to accord sanction for the following larger interests of the Province and the Poor Ryot population:-

(1) One Central Ayurvedic Veterinary College and Research Centre should be opened for the whole province and four local colleges should be organised on the linguistic basis.

(2) One Ayurvedic Veterinary Hospital or Dispensary should be started for every group of ten or fifteen villages.

(3) One Central Phamaceutical works should be started for the manufacture and supply of genuine medicines to the Hospital in various centres of the Province.

(4) Adequate grants should be given to the deservin institutions which are really doing service for the promotion of the Ayurveda Pasuvaidya Science.

(5) A separate Directorate should be established to advise Government on Ayurvedic branch of Veterinary Services and only those experts who are well-versed in General Ayurveda and have specialized in Ayurvedic Veterinary Science shall be appointed as the Director, Deputy Director, and Inspectors on salaries in harmony with the lowered scales approved by the National Congress.

6) Experts in cattle-breeding and biological, anatomical and surgical branches of Western Veterinary schience should be attached to our Ayurvedic Veterinary Colleges in the same way as they are now being attached to the Indian School of Medicine.

Roc. No. 6196-II/47. Civil Veterinary Department, Madras, dated 1-11-1947.

From

T.J. Hurley Esq., OBE., MRCVS., DVSM., IVS.,
Director of Veterinary Services, Madras.

The Secretary to Government,
Development Department, Madras.

Sir,

Sub: Veterinary - Ayurvedic Veterinary Medicine - Development - Government's assistance.

Ref: Government Memorandum No. 16844-E/47-9 Development dated 4-10-1947.

- - -

I have the honour to invite the attention of Government to my letter ROC.No. 5508-II/39 dated 13-10-1939, a copy of which is enclosed herewith for ready reference and to state that as far as my information goes, there is only one pers viz., Sri Y. Sreeramulu Chowdry of Angaluru (Kistna District) who has been training students in the Ayurvedic system of Ve- Veterinary Medicine, but I do not know if he still continues to do so. Presumably the students trained by Sri Chowdry are practicing but they are not qualified for appointment in this Department. In this connection I invite the attention of Government also to my letter D.Dis. No. 6176-II/47 dated 28-10-1947 sent in reply to Government endorsement No. 94009-E/47-1, Development dated 3-10-1947.

I have the honour to be,

Sir,

Your most obedient servan

- - -

I have the honour to invite the attention of Government to my letter Roc. No. 5508-II/39, dated 13-10-1939 sent in reply to Government memorandum No. 22691-III/39-21, Development, dated 12-9-1939 and to state that my opinion about the Ayurvedic system of Veterinary medicine has not changed since., then.

P.T.O.

2. There is very little difference as far as I am aware between/Ayurvedic system of Veterinary medicine and what /the is called 'Quackery' in Western countries. The latter was very prevalent in the past, but is gradually dying out as the people become more educated and more scientifically trained Veterinary Surgeons become available. I see no reason why there should not be a similar tendency in India.

3. Government sanction and support to the requests made in the/~~memdum~~ under reference would in my opinion be a /memo retrogressive step as far as Veterinary Science is concerned, and I am therefore unable to support them.

GOVERNMENT OF MADRAS

MEMORANDUM NO. 2960-III/39-1, Dated the 22nd February 1939.

***

Rules - Veterinary institutions - Contribution by Local Bodies.

Ref: G.O. No. 342, Local Administration Department Dated the 27th January, 1939.

- - -

The President, Andhra Jatheeya Pasuvaidya Vidya Peetam, Angaluru, Kistna District, has represented to Government that the medicines used in the Ayurvedic Deispensaries run by him bear Telugu names and has requested that Telugu Knowing Ayurvedic Doctors who have knowledge of Pasuvaidyam may be deputed for inspecting such institutions for the purpose of recommending grants from local bodies.

The Government are unable to accept the suggestion The Director of Veterinary services is however informed that in the case of this and other Veterinary Institutions conducted according to the Indian System of Medicine the inspection for the purpose of advising the District Boards in the matter of making contributions in aid of such institutions shall be made by the District Veterinary Officers conversant with the Language of the area where the institutions are working.

Sd) R. Ramaswamy Ayyangar
Asst. Sec. to Government.

P.T.O.

(7) An Advisory Council of Practitioners and Experts and peasants who are interested in Ayurvedic Veterinary Science and Practice shall be established.

(8) Pending the adoption and development of the above mentioned schemes the G.O. No. 342, ~~Loc~~ Local Administration Department dated 27th January, 1939, which has prevented our Dispensaries and Practititioners from receiving grants etc., from the local Bodies should immediately be cancelled. The grants should be disbursed, after sanction by the Government, only after the said applications are sent through the Vaidyapeetham.

(Sd) Y. Sreeramulu,
President
Andhra Jatheeya Padu
Vaidya Vidya Peetam,
Tenali.

Place: Tenali,

Date : 3.7.1946.

SP/24.7. /True Copy/

District Veterinary Officer Bezwada and reports submitted to the late Director for the purpose of contribution for these Veterinary Institutions from local bodies. None of these institutions, however, were approved by the late Director as the reports received from the District Veterinary Officer disclosed that the treatment given at these instituitions was not satisfactory and as the men in charge did not possess an adequate knowledge of Veterinary matters.

2. As desired by Government, during my recent tou in Bezwada Circle, I inspected two of the above Ayurvedic of Veterinary Dispensaries one at Amruthalur in Tenali Taluk and the other at Manikonda in Bezwada taluk, in addition to the dispensary at Angalur which is in charge of the principal of the school attached to it viz., Sri Y. Sriramalu Chowdary. The dispensaries at Amruthalur and Manikonda are located in buildings having one room in which about 30 medicines and half a dozen instruments are stocked. The majority of the medicines are those commonly used by the Veterinary Assistant Surgeons of this department and are used alone or in various combinations. During my inspection, I was more particular to find out exactly the amount of Veterinary knowledge possessed by the graduates. I did not of course expect them to posses a high standard but on questioning them, discovered that they had not even an elementary knowledge of the subject. They had in fact no knowledge at all of the cause of disease and as far as I could find out, their knowledge did not extend beyond the fact that certain medicines and prescriptions may be used for certain abnormal conditions, a knowledge which can easily be acquired by any stockman. The Principal of the school attached to the Veterinary Dispensary at Angalur, who trained these graduates was interviewed later and again I was more interested in finding out the extend of his Veterinary knowledge them in his display of drugs. The Principal showed a little more knowledge than his graduates, but not more than any intelligentlayman who took an interest in the subject should acquire. This Veterinary dispensary at Angalar was first inspected by the District Veterinary Officer in January 1938 and a report was submitted to Government in this office letter L.Dis.No. 1758-G/3 dated 21-3-38. It was again inspected by the District Veterina Officer in March '39, Vide in this connection this office letter D.Dis.No. 932-II/39 dated 17-4-39 to Government and G.O.No.Ms. 1867, Local Administration dated 12-5-1939. For the third time, this Veterinary Dispensary was inspected by the District Veterin Officer on 30-5-1939. The Veterinary Investigation Officer also recently inspected this vide in this connection this office letter ROC.No. 4074-II/39 dated 28-9-1939 to Government.

3. In conclusion, I must say that I was not impressed with the working of these Veterinary Institutions and am therefore unable to approve them for the purpose of contribution from local bodies.

(Previxous notes need not be read)

Summary.

The file deals with the representations of Sri. Y. Sriramulu, President Andhra Jatheeya Pasuvaidya Peeth, Tenali regarding the encouragement to be extendked to Ayurvedic system of Veterinary medicine.

In G.O. No. 342 Local Administration dated 27-1-19 the Government ordered that the power of a District Board to make contiibutions in aid of the establishment and maintenance of Veterinary hospitals and dispensaries in the District under the Madras Local Board Act should be extended only to such Veterinary hospitals and dispensaries as were approved by the Director of Veterinary Services. In September, 1939 it was represented to Government that none of the Ayurvedic Veterinary institutions were approved by the Director of Veterinary Services for the purpose of grant. The Rixxxxxxxxxx xxx Director was therefore asked to state how the eligiblity of Ayurvedic Veterinary institutions was assessed for the purpose of grants from local bodies. He was also asked to inspect some of these Ayurvedic Veterinary institutions and submit a report to the Government. The Director inspected two of these dispensaries and reported tha these dispensaries had about 30 medicines commonly used by ~~Veteri~~ Veterinary Assistant Surgeons of the Veterinary Department and about half a dozen instruments, & that the Veterinary graduates in charge of them did not even have an elementary knowledge of Veterinary science, and that the principal of the school at Angalur should a little more knowledge then his graduates but not more than any intelligent layman interested in the subject could acquire. The Director reported that he was not impressed with the working of those institutions and was unable/to approve them for the purpose of contribution from local bodies. Finally the Government ordered that they were unable to reconsider the orders in G.O. 342 Local Administration dated 27-1-1939.

2. In July, 46 Sri Yejella Sriramulu, President, Andhra Jatheeya Pasuvaidya Peeth, Tenali represented that the practice of Ayurvedic Veterinary medicine had to be systemised and scientifically developed that one central Ayurvedic Veterinary college and an Ayurvedic dispensary for every 10 or 15 villages should be started. His suggestions in this regard are on pages at 'M' on pages 10-12 c.f. Among thevarious suggestions made by him on pages 10-12 c.f and 19-21 c.f only the following requestes arise at present:-

(1) that the government should start Ayurvedic Veterinary hospitals in all the 34 developme firkas.

(2) that G.O. 342, Local Administration dated 27-1-1939 which prevented the Ayurvedic dispensaries and practitioners from getting grants from the local Boards may be cancelle

The remarks of the Director of Veterinary Services were called for on the petition. His remarks are on pages 17-18- c.f. He reported that his opinion about Ayurvedic veterinary Medicine mentioned at 'A' above has not charged, that there was very little difference between Ayurvedic ~~xx~~ system of Veterinary Medicine and 'Quakery' and that the Government sanction and support to the requests

of the petitioner at 'M' on pp 10-11 c.f. would be a retrogressiv step and that he was therefore unable to support them. In view of the Director's report it was considered that no action was necessary on the requestes at M on pp 10-11 c.f. in this department. The request for caneellation of G.O. 342, Local Administration dated 27-139 and to start Ayurvedic Hospitals in all the 34 Development firkas were considered in the Local Administration and Public (Firka Development) Departments respectively. Local Administration Department have considered that in view of the Director's report on pp 13-14 c.f. the District Boards need not be permitted to make contributions to the so called Ayurvedic Veterinary hospitals started by the petitioner and his pupils, that any contribution from District Board funds spent on such institutions will be a waste of the vax-payers money, and that there is no justification for cancelling G.O. 342, Local Administration dated 27-1-1939. It is therefore for orders whether the petitioner will be informed accordingly as regards the opening of Ayurvedic Veterinary Institutions in all the Development firkas, it has been decided M| in the Public (Firka Development) Department that the scheme may be tried as an experimetne in one firka viz. at Dendalur firka in West Godavari District, and to being it forward as a part II scheme for 1948-1949. This has been approved by Hon'ble Minister (Agriculture), Hon'ble Minister (Finance) and Hon'ble Prime Minister and necessary action is being taken in Public B| (Firka Development) No further action necessary on this request in this file for orders

(Sd) x x x x ..
24.2.47.

Has any reply been given to petitioner with reference to his petition in July 1946? If not, how do you say no further action is necessary on this file? Should not a suitable reply be sent to him?

(Sd) . . . . .

25.7.47.

Submitted that no reply has been given to the petitioner with reference to his petition in July,1946. A draft reply will be submitted for approval, after orders are passed, on 'A' and 'B' above.

(Sd) x x x x x x x
29.7.1947.

No further action seems neccessary. The experiment in Dendalur Firka may be watched before Ayurvedic Veterinary institutions are sponsored by Government elsewhere. A suitable reply may be given to the petitioner.

(Sd) x x x x
30.7.47.

Let this go to Hon'ble Minister Local Administration first please.

H.M. (Agri.) (Sd) x x x x x

H.M. (L.A.) (Sd) xxxxxxxxx

H.P.M. (Sd) xx x x x

I would like that Honible Minister (Agriculture) should reexamine the whole question and see that Ayurvedic system of Veterinary Science also is recognised and such doctors as are qualified may be appointed in Rural Parts.

SP/24.7.

Atleast I would like a beginning should be made by starting few centres and the working be watched.

(Sd) x x x x x x
11.8.

Submitted to Hon'ble Minister (Agriculture) and Hon'ble Prime Minister.

(Sd) xx x x x
19.9 11.8.

My difficulty is to find out who the qualified Doctors are under the Ayurvedic system for Veterinary purposes There is no recognised institution for Ayurvedic Veterinary Doctors. They can do very little of Surgical work. The at most the Government can do is to give a grant to any institution which run on Ayurvedic lines. I donot know what Hon'ble Minister (Local Administration) means by "Such Doctors as are qualified." I know previous little of this; and I donot know of any person doing Ayurvedic Veterinary work, inmy Districts I know of some reputed physician who do treatment for elephants.

Hon'ble Prime Minister may see this at this stage whether this should be perused.

(Sd) x x x x x x

13

We will have to systemtise this and peurse and find out wher- are these kind of people.

4.10.1947.

(Issued as Memo No. 16844-F-47-9 dated 4.10.47)

From the Director of Veterinary Services No. 6196-II/47 dated 1-11-1947.

(Summary from the middle of page 14 ante may be read).

The memo to the Director of Veterinary Services on page 63 c.f. and his reply on page 67 c.f. may be perused. The Director has that as far his in formation goes, Sri Y. Sriramulu Chowdary, (the Petitioner) is the only person who has been training students in Ayurvedic System of Veterinary

Medicine. He has however stated that the students trained by him are not qualified for appointment in the Veterinary de department.

As already stated, the question of opening Ayurvedic Veterinary dispensaries in the various firkas a centres selected for Intensive rural reconstruction work has been examined and the Government have ordered in G.O. 8 Firka Development dated 8.11.1947 that the scheme may be tried as an experimental measure in the first instance in one of the selected firkas. Sanction has been accorded to the opening of an Ayurvedic Veterinary dispensary by Sri Ramulu Chowdary in Dendalur firka West Godavari District in the current year at a cash of Rs. 1,200Ø. The Director of Veterinary Services has been asked to report in detail about the working of the hospital at the end of every 3 months. In the circumstances, it is for orders whether the results of the experiment will be awaited before taking any further action on the requests of the petitioner "(Sri Sriramulu Chowdary) mentioned at 'K' ~~page 15~~ above. Results of experiments may be awaited before proceeding further.
